Radian Solutions Achieves CMMC Level 2 Certification

Sacramento, CA – 12/16/2025 — Radian Solutions announced today that it has achieved Cybersecurity Maturity Model Certification (CMMC) Level 2 (Advanced) Certification following a successful independent assessment conducted by an authorized CMMC Third-Party Assessment Organization (C3PAO).

Radian Solutions achieved a perfect assessment score of 110, confirming full implementation and institutionalization of the 110 security requirements derived from NIST Special Publication (SP) 800-171 for the protection of Controlled Unclassified Information (CUI), in accordance with the Department of Defense's CMMC Program requirements under 32 CFR Part 170.

The C3PAO assessment evaluated Radian Solutions' security policies, procedures, system implementations, and operational practices to verify compliance with DoD cybersecurity requirements applicable to contractors that handle, store, or transmit CUI in support of DoD missions.

"Achieving CMMC Level 2 certification with a score of 110 demonstrates our disciplined approach to cybersecurity and our commitment to meeting the Department of Defense's requirements for protecting Controlled Unclassified Information," said Niranjan Hiras, President of Radian Solutions. "This independent validation positions Radian Solutions to support DoD programs and prime contractors with confidence and assurance."

With CMMC Level 2 certification, Radian Solutions is eligible to perform on DoD contracts that require CMMC Level 2 as a condition of award, supporting acquisition programs where the protection of CUI is mission-critical.

Radian Solutions maintains an ongoing cybersecurity program that includes continuous monitoring, risk management, and governance practices to sustain compliance with applicable DoD and federal cybersecurity requirements.
